

Cleveland Clinic Employee Health Plan Prescription Drug Formulary

Cleveland Clinic Health Benefit Program

Drug Formulary

July 2019

Prescription Drug Coverage

The listing of a drug in the Formulary does not guarantee coverage if your contract does not cover that category of drugs (e.g., oral contraceptives, infertility agents). Refer to the Benefits and Coverage Clarification section (page 13) in the *Handbook* to determine specific coverage.

Approved Medications — Only FDA-approved medications are eligible for coverage.

Non-Covered Medications — These drugs are determined by the terms of the member's group health plan. The following are examples of, but not limited to, drug categories that plans exclude from coverage: drugs used for cosmetic purposes, weight control, promotion of fertility, and sexual dysfunction.

Generic Medications (Tier 1) — The Cleveland Clinic Health Benefit Program supports and encourages the use of FDA-approved generic drugs that are both chemically and therapeutically equivalent to manufacturers' brand name products. Generically equivalent products are safe and effective treatments that offer savings as alternatives to brand name products.

This Formulary lists both a generic and a brand name for the purpose of drug recognition.

Preferred Brands (Tier 2) — An FDA-approved drug of proven therapeutic efficacy and safety and approved by the P&T Committee for inclusion in the Formulary.

This Formulary lists both a generic and a brand name for the purpose of drug recognition.

Non-Preferred /Non-Formulary Brands and Generics (Tier 3) — Any FDA-approved medication which has been reviewed by the P&T Committee and not added to the Formulary or is new and has not yet been reviewed by the P&T Committee is considered a Non-Preferred/Non-Formulary drug. A higher co-insurance is charged for Non-Preferred/Non-Formulary medications.

Specialty Drugs (Tier 4) — An FDA-approved drug of proven therapeutic efficacy and safety and approved by the P&T Committee for inclusion in the Formulary as a specialty medication due to its complex nature, administration, handling, and/or treatment of a complex disease state.

Compounded Prescriptions — A customized medication prepared by a pharmacist according to a doctor's specifications. Compounded prescriptions are considered Non-Preferred and have a charge of 45% at any Cleveland Clinic/Akron General Pharmacy or 50% at all other locations.

Investigational/Experimental Drug Use — A medication pending FDA approval or a FDA-approved medication not generally recognized by the medical community as effective or appropriate for a particular diagnosis. Charges for experimental or investigational drugs are not a covered benefit.

Important Points About the Cleveland Clinic Health Benefit Program Drug Formulary

- The Formulary lists medications that are included in Tier 1, Tier 2 and Tier 4 of the HBP Prescription Drug Benefit (Tier 3 are Non-Preferred/Non-Formulary drugs). All of the medications listed in this Formulary are considered formulary medications. This Formulary is designed to assist members and physicians to enhance cost savings by using Generic (Tier 1), Preferred Brand (Tier 2) and Specialty Drugs (Tier 4), thereby making all drugs in these Tiers the preferred drug(s) of choice. ***Take this Formulary with you to all physician appointments.***
- Coverage of certain Formulary medications may also be subject to restrictions established by the Pharmacy and Therapeutics (P&T) Committee.
- Brand names are listed in the Drug Formulary only as a reference to help you identify the Preferred drug and do not indicate coverage of a particular brand. Brand names are capitalized (e.g., Amoxil) and generic names are in lower case (e.g., amoxicillin).
- The inclusion of a drug on this list does not mean that all strengths or dosage forms for a given drug are covered under your prescription drug benefit. Medication strengths or dosage forms that are excluded from the formulary can be found in the Non-Covered Medications section starting on page 16.
- Designated symbols/letters follow certain drugs listed in the Formulary and indicate criteria related to the drugs as follows: (*) indicates availability of a generic equivalent; (**) indicates availability of a generic equivalent but the brand product is still covered as a Preferred Brand (Tier 2); (PA) indicates that prior authorization is required for use (physician must submit a Prior Authorization, Formulary Exception and Appeal Form); (SP) indicates a specialty drug (a higher co-insurance may be charged and medications only available through Cleveland Clinic/Akron General Pharmacies, Cleveland Clinic Specialty Pharmacy, or the CVS/caremark Specialty Drug Program); (QL) indicates the drug has a quantity limit. (ST) indicates the drug is part of the Step Therapy Program.
