Personal Program Requirements – CHRONIC CONDITION (eCoaching)

Guidelines for setting goals

Your Health Coach will set realistic, personalized goals for each condition that is identified for you, including some educational goals as you work together throughout the program.

Weight Management

Your weight loss goal will be based on your starting BMI (Body Mass Index).

- **Weight Loss Goal Guidelines:**

Goal: Lose 1 BMI point or reach a BMI less than 27

NOTE: *If your final weight is above your starting weight, or you do not report a final weight, you will get no credit for participating in the Weight Management program.*

NOTE: *Some members with a higher muscle mass may be eligible to complete a Body Fat Analysis if the BMI is not an accurate measurement of body composition. If you do not agree with your weight diagnosis, you must contact the health plan to request an appeal before you can start participating. If you're already enrolled in eCoaching, contact your Health Coach to make this request.*

Weight Management for Pregnant Moms:

Pregnancy changes your program requirements. Contact your Health Coach for information and updates.

Hyperlipidemia (High Cholesterol)

Your Health Coach will work with you to establish an LDL goal.

- **LDL Goal Guidelines:** Annual LDL at or below 130

NOTE: *If your LDL reading is above your starting LDL, or you do not report a final LDL, you will get no credit for the program.*

Nicotine/Tobacco use

Your Health Coach will work with you to establish a plan to quit using nicotine/tobacco.

Goal Guidelines:

- To be eligible for full credit you must participate for a minimum of three months and submit a negative cotinine test by Sept. 30 to verify that you quit nicotine/tobacco.
- To be eligible for partial credit you must participate for a minimum of three months by Sept. 30.

If you believe these guidelines don't apply to you, or if you have other questions about eCoaching, contact your Health Coach.
